

Case Study

Northumberland Road, Harrow, London

Client: Private homeowner

Details of the Design:

2 bespoke helical staircases.

Fabrication detail:

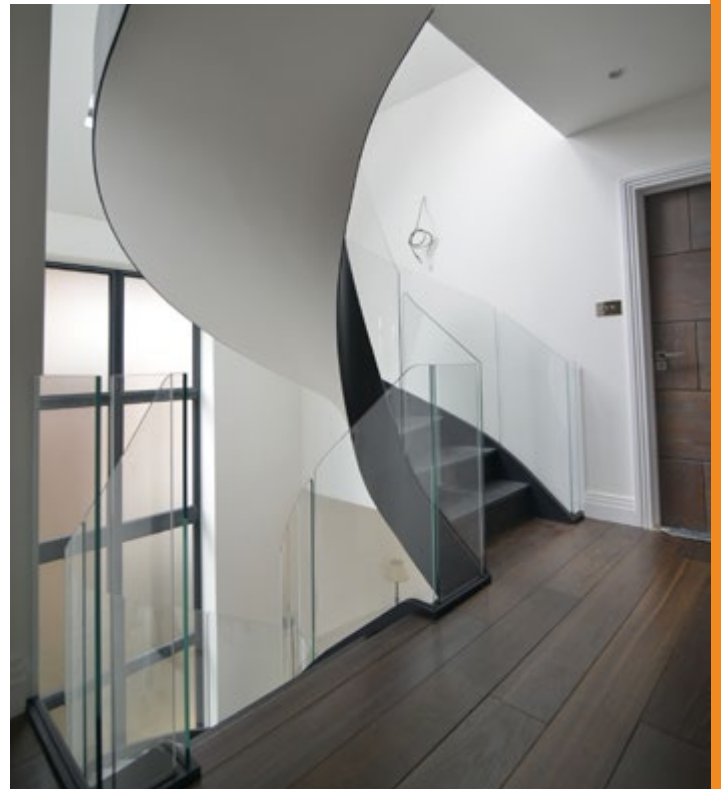

The Elite Metal Group was contacted to assist with the refurbishment of a substantial North London home. The new owners wanted a complete overhaul of the property to create a contemporary, modern feel to the home.

2 helical staircases were designed, manufactured, delivered and installed by the Elite Metal Group team with dark stone trends and similar stringers used to maximise the scale of the ceilings and the newly fitted window that allows light to flow within the home.

Installation detail:

We were fortunate enough to be instructed to project manage the entire staircase which ensure that we were able to use our Team to complete a survey before any work commenced. This information ensured that our drawings were 100% accurate which gave our Design Team complete confidence.

We're well versed to working around other tradespeople and this project was no exception.

The finished project:

This project was an absolute dream to be involved in. The homeowners had a very clear vision of what they wanted to achieve and our design works seamlessly within their new home.
